

LIMS BOX

ISO 15189 Personnel Pack

Customer edition: printable personnel documentation worksheets for medical laboratories using ISO 15189:2022.

Includes: personnel file cover sheet, role and qualification index, induction and training record, procedure authorisation record, competence plan and evidence log, corrective-action follow-up, professional-development calendar, document register, review trail, and ISO 15189 personnel mapping worksheet.

VERSION 1.5 | CUSTOMER EDITION | 27 AUGUST 2026

IMPORTANT: This is a blank documentation aid. It does not certify conformity or accreditation, determine personnel qualifications or competence, replace a licensed copy of ISO 15189:2022, or replace accreditation-body, legal, or laboratory-specific requirements.

1. How to use this pack

Use these worksheets as a controlled starting point for personnel documentation. The laboratory remains responsible for deciding what applies, assigning authorised reviewers, protecting records, and retaining evidence.

- ☐ Make a working copy and assign a document owner before use.
- ☐ Map each form to your licensed ISO 15189:2022 copy, accreditation programme, local law, and laboratory policy.
- ☐ Replace generic fields with laboratory-specific roles, examinations, competence criteria, review cycles, retention periods, and approval authority.
- ☐ Use unique identifiers and version numbers. Never erase a superseded or revoked record; preserve history according to policy.
- ☐ Do not place patient identifiers in this pack unless your approved privacy and record-control workflow requires and protects them.
- ☐ A blank box is not evidence. Attach or reference the underlying observation, worksheet, quality record, maintenance record, examination challenge, training record, or other objective evidence.

High-level ISO 15189 personnel record categories

Category	How this pack supports local documentation
Responsibilities and records	Define roles, responsibilities, authorities, and the controlled evidence retained for each person.
Competence and authorisation	Define role- and examination-specific competence criteria, evaluate evidence, record conclusions, and control the scope and status of authorisation.
Education and development	Plan induction, training, continuing education, professional development, and reassessment appropriate to assigned work.

Use the laboratory's licensed ISO 15189:2022 copy to verify exact requirements and clause applicability before adopting any form.

2. Personnel file cover sheet

Create one controlled cover sheet for each personnel file. Use references to supporting documents rather than duplicating sensitive records.

Laboratory / site	
Personnel name	
Personnel ID	
Role / category	
Department / section	
Hire / assignment date	
Supervisor	
File owner	
File review date	
Next review due	

File component	Reference	Verified by
☐ Application / resume / CV	Date / document ID	Reviewer
☐ Education / transcript evidence	Date / document ID	Reviewer
☐ License(s), if applicable	Date / document ID	Reviewer
☐ Certification(s), if applicable	Date / document ID	Reviewer
☐ Current job description	Date / document ID	Reviewer
☐ Induction and initial training	Date / document ID	Reviewer
☐ Initial competence evidence	Date / document ID	Reviewer
☐ Ongoing competence evidence	Date / document ID	Reviewer
☐ Procedure authorisations	Date / document ID	Reviewer
☐ Continuing education / retraining	Date / document ID	Reviewer
☐ Restrictions / corrective actions	Date / document ID	Reviewer
☐ Other lab-required evidence	Date / document ID	Reviewer

Customize this form to your laboratory, roles, examinations, licensed standard, accreditor instructions, and local law.

3. Role, qualification, and credential index

Define the local criteria for an assigned role, record what was reviewed, identify the authorised evaluator, and retain the evidence reference. This worksheet does not decide suitability for the laboratory.

Personnel name / ID	
Role / category evaluated	
Role criteria / policy reference	
Evaluator and authority	
Evaluation date	
Final determination	
Conditions / limitations	

Evidence type	Institution / issuer	Credential / degree	Issue date	Expiry	Document ID / location

Suitability decisions must be made by an authorised laboratory role using the licensed standard, local law, accreditor instructions, and laboratory policy.

4. Induction and training record

Document induction or planned training, the controlled source procedure, observed practice, outcome, and follow-up. Training completion is not the same as a competence determination.

Personnel name / ID	
Procedure / test system	
Procedure document ID / version	
Trainer and role	
Training start date	
Training completion date	

Date	Training activity / topic	Method / evidence	Outcome / gap	Trainer initials

Training summary / limitations	
Next step / competence assessment due	

Customize this form to your laboratory, roles, examinations, licensed standard, accreditor instructions, and local law.

5. Procedure authorisation record

Record the scope and authority of a procedure-specific authorisation. Link it to the supporting competence evidence and preserve status and revocation history.

Authorisation ID	
Personnel name / ID	
Role	
Procedure / examination	
Procedure document ID / version	
Supporting competence record ID	
Authorised scope / restrictions	
Authorised date	
Effective date	
Review / expiry date	
Authorised by / title	
Approval signature / attestation reference	

Status

☐ Active	☐ Restricted	☐ Expired	☐ Revoked
Revoked / changed date			
Authority			
Reason and replacement record			

Do not delete or overwrite prior authorisation states. Follow laboratory policy for authority, attestation, retention, restrictions, and reauthorisation.

6. Competence assessment plan

Define role- and examination-specific competence criteria and the objective evidence the authorised assessor will review. The laboratory sets methods and timing from its licensed standard, local requirements, risks, and policy.

Personnel name / ID	
Role / examination / procedure	
Competence criteria document ID	
Assessment cycle / trigger	
Assigned assessor / authority	
Planned completion date	

#	Planned evidence category	Evidence / record ID	Due
1	Observed performance against the current procedure and assigned scope		
2	Review of generated records, results, calculations, or reports		
3	Review of quality, control, comparison, maintenance, or related evidence relevant to the role		
4	Response to nonconformities, exceptions, or problem-solving scenarios		
5	Knowledge or understanding evidence appropriate to the assigned activity		
6	Other laboratory-defined evidence linked to local competence criteria		

Local planning checkpoint

- ☐ Criteria and acceptance thresholds are defined before assessment.
- ☐ Assessor competence and authority are documented.
- ☐ New or changed duties, methods, equipment, or risks are evaluated as reassessment triggers.
- ☐ Restrictions and supervision remain visible until an authorised decision changes them.

This page intentionally does not prescribe universal assessment methods or intervals. Verify the local plan against the licensed ISO 15189:2022 standard and applicable requirements.

7. Competence evidence and result

Document the evidence reviewed and the authorised assessor's conclusion against predefined local criteria. Do not infer an overall outcome from checked boxes alone.

Assessment record ID	
Personnel name / ID	
Test system / procedure	
Procedure version	
Assessment period	
Assessor / title / authority	
Assessment date	

#	Evidence category	Evidence ID / description	Result	Assessor initials
1	Observed performance against the current procedure and assigned scope			
2	Review of generated records, results, calculations, or reports			
3	Review of quality, control, comparison, maintenance, or related evidence relevant to the role			
4	Response to nonconformities, exceptions, or problem-solving scenarios			
5	Knowledge or understanding evidence appropriate to the assigned activity			
6	Other laboratory-defined evidence linked to local competence criteria			

Authorised conclusion

☐ Competent within stated scope	☐ Additional evidence required
☐ Restricted / supervised	☐ Corrective action required

Scope, restrictions, or gaps	
Corrective action / follow-up record	
Next assessment due	
Assessor attestation / date	
Director / authorised reviewer / date	

8. Corrective action and restriction follow-up

Connect a gap to an immediate control, corrective action, objective evidence, reassessment, and an authorised closure decision.

Follow-up record ID	
Related assessment / authorisation ID	
Personnel name / ID	
Procedure / examination	
Gap / event identified	
Immediate restriction / supervision	
Root-cause review	
Corrective action plan	
Owner	
Target date	
Reassessment method	
Reassessment date	
Evidence reviewed	
Outcome / remaining restriction	
Closure authority / date	

A restriction or suspended authorisation remains in effect until the laboratory's authorised decision-maker documents the change or closure.

9. Continuing development and review calendar

Plan and reference continuing education, professional development, competence review, authorisation review, and other laboratory-defined personnel events. Calendar entries are reminders, not evidence that work occurred.

Due date	Personnel	Development / review activity	Purpose / trigger	Owner	Completed / evidence ID

Periodic control

- ☐ Overdue development and review events are assigned.
- ☐ Changes in duties, methods, equipment, or risk are reviewed for reassessment needs.
- ☐ Expiring credentials and authorisations are reviewed.
- ☐ Restrictions and open corrective actions are reviewed.
- ☐ Completion is reconciled to objective evidence IDs.

Customize this form to your laboratory, roles, examinations, licensed standard, accreditor instructions, and local law.

10. Document control register

Track the approved version, owner, location, review cycle, and status of every form or procedure used in the personnel process.

Document ID	Title	Version	Effective	Owner	Approved by	Status / location

Version change record

Document ID	From	To	Change summary	Approved by / date	Superseded copy location

Use the laboratory's licensed ISO 15189:2022 copy, accreditor instructions, local law, and policy to define document-control and retention requirements.

11. Personnel-process review trail

Record periodic checks of the process itself: completeness, overdue work, authorisation gaps, corrective-action closure, and record control.

Review ID	
Review date	
Reviewer / independence	
Scope / period covered	
Sample / population	
Criteria used	

Check performed	Evidence / sample	Finding	Action / owner / due

Overall conclusion	
Open actions and next review	
Reviewer attestation / date	

Customize this form to your laboratory, roles, examinations, licensed standard, accreditor instructions, and local law.

12. ISO 15189 personnel mapping worksheet

Complete this page from controlled, current sources. The pack uses high-level personnel categories and intentionally does not reproduce the licensed standard, prescribe universal criteria, or supply a universal retention schedule.

Authority	Controlled source / edition	Requirement / purpose	Pack record	Gap / owner
ISO 15189:2022 §6.2	Licensed copy / accreditor	Personnel responsibilities, competence, authorisation, education and records		
Role criteria	Laboratory-controlled policy	Education, qualification, experience, competence and authority defined locally		
Competence process	Laboratory-controlled policy	Criteria, evidence, assessor authority, conclusion and reassessment		
Authorisation process	Laboratory-controlled policy	Scope, effective status, restrictions, review and revocation history		
Local law / rule				
Accreditor guidance				
Other controlled source				

Final release check

- ☐ Every requirement claim is tied to a controlled source.
- ☐ No obsolete ISO edition or clause numbering remains in active forms.
- ☐ Roles and signatures match current laboratory authority.
- ☐ Retention, privacy, and access controls are documented.
- ☐ Blank, not-applicable, overdue, restricted, revoked, and missing-evidence states are distinguishable.
- ☐ An independent reviewer checked the completed local customisation before use.

If the controlled sources disagree or are unclear, stop and obtain a written interpretation from the applicable regulator or accreditor.

13. Sources, boundaries, and customer support

These links support the limited public claims in this customer edition. They do not substitute for the licensed ISO standard, accreditation-body instructions, local law, or laboratory-specific requirements.
